From February 21st until February 27th, Wimberley Water Supply Corporation will be replacing an existing two-inch water main with a six-inch main on the Wimberley Square. Construction will begin on the west side of the Square in front of Blue Bacon Toys and run alongside the Wimberley Café, extending approximately 375 feet to the corner property line between Chick-A-Dees and Wimberley Log Homes.

This line is being replaced due to age, its limited size, and the problems with location of the existing line. Merchants have been notified of the planned work, which will be done during the overnight hours to minimize the inconvenience on merchants and their customers. As such, water outages should not be a problem. Along with replacing the existing main, a new fire hydrant will be installed during construction to enhance fire protection in the merchant district.
