

## **CENTRAL WIMBERLEY MASTER PLAN**

Meeting Notice – Stakeholders and the Public

Tuesday, June 03, 2014

The City of Wimberley has retained the services of Design Workshop and their subconsultants, Black and Vernooy Urban Design and Architecture and Binkley & Barfield, Inc., to conduct a Vision Charrette and develop a Master Plan for Central Wimberley. The target area for the Central Wimberley Master Plan includes land adjacent to Ranch Road 12, Old Kyle Road, and Ranch Road 3237 and roadways between the Cypress Creek and Blanco River in downtown Wimberley, Texas.

The goal of this project is to develop a vision for Central Wimberley that builds on the existing assets and unique character of the area to create a vibrant and enduring future for the community. The resultant master plan will be used to assist the City of Wimberley when making decisions about future growth and new private and public investment in the target area over the next several years.

We need your input to identify the character of Central Wimberley and confirm key goals for the master plan. Please attend the following meetings to contribute to the process of shaping the future of Central Wimberley.
