**F. WORKSHOP SESSION:**

Commissioner Conley explained the agenda for this second RR12 planning workshop, and Watson and Baker led the planning presentation.

A set of road cross section cutouts was used to assemble and display a number of possible combinations of lanes, shoulders, medians, trails, etc. There was general agreement that a divided highway with a generous, treed median would be desirable. This would require a wider right-of-way than the design proposed by TxDOT last year.

It was suggested that the existing lanes could become one half of this proposed divided highway, with the two new lanes located so that they create a median wide enough to preserve the existing trees along the current fence line.

The presenters pointed out that conditions vary along the highway, and two or three different cross sections may be necessary to accommodate these differences.

The third workshop is scheduled for the next TAB meeting, when HNTB will present more precise evaluations of the possible configurations and more information on costs and limitations.

**G. DISCUSSION AND POSSIBLE ACTION:** None
